Have you ever struggled with map making? Spent countless hours trying to make it comply with the laws of nature. This book is a step-by-step guidebook that will teach you how to create an authentic fantasy map. You will gain all the knowledge necessary to complete a map which your audience will believe, no matter if they are readers, viewing a movie, video game players, or role-playing gamers. It contains the exact process I use when creating maps for my fantasy fiction. I have spent countless hours researching and learning about the topography of Earth and how to apply it to a fantasy map so that you do not have to. I have translated it all into 14 easy steps which allow you to construct an entire fantasy map from start to finish. Step One: What you need to consider before starting your map. Step Two: The different options for creating the map: from hand-drawn over software to

hiring a professional. Step Three: An overview of what is to come. Step Four: Sketch your map and make sure to get size of the world just right. Step Five: Adding continents by understanding how tectonic plates work.

Step Six: Terraforming your world. Step Seven: Incorporating islands and lakes. Step Eight: Making sure that rivers are realistic. Step Nine: Adding forests.

Step Ten: Borders and understanding how the lands will affect the people who live on them, and vice versa. Step Eleven: It's then time for roads. Step Twelve: Optional fantasy elements. Step Thirteen: The final touches. Step Fourteen: The Map Master.

As a companion to this book, you will be able to download a free worksheet. This is not a book to teach you how to draw. It's about designing.
