Cities, by their very nature, are a mass of contradictions. They can be at once visually stunning, culturally rich, exploitative, and unforgiving. In *The Lure of the City*, Austin Williams and Alastair Donald explore the potential of cities to meet the economic, social, and political challenges of the current age. This book seeks to examine the dynamics of urban life, showing that new opportunities can be maximized and social advances realized in existing and emerging urban centers. The book explores both the planned and organic nature of urban developments and the impacts and aspirations of the people who live and work in them. It argues convincingly that the metropolitan mindset is essential to the struggle for human liberation. The short, accessibly written essays are guaranteed to spark debate across the media and academia about the place of cities and urban life in our ever-changing world. But *The Lure of the City: From Slums to Suburbs* has a slightly different and very intriguing agenda. This collection of essays is, in effect, a defence of modernism.
